OCCI Application

The OCCI Application specification defines kinds and extensions relating to management of cloud application services (SaaS).

Table 1. Common Attributes

Attribute	Type	Description
`occi.application.version`	Float (e.g. 1.0)	Version of the OCCI Application specification

Kinds

Cloud application services can be modeled using the following primary kinds:

Table 2. Kinds

Kind	URI	Description
`contact`	`http://purl.org/ occi/kind/contact`	A contact; a person, a venue such as a club or a restaurant, or an organisation.
`document`	`http://purl.org/ occi/kind/document`	A word processing document
`event`	`http://purl.org/ occi/kind/event`	A calendar event
`presentation`	`http://purl.org/ occi/kind/ presentation`	A visual representation
`spreadsheet`	`http://purl.org/ occi/kind/spreadsheet`	A worksheet

Contact

A contact is a person, venue, organisation, etc.

Extensions

Various extensions provide for more advanced management functionality such as billing, monitoring and reporting.
